

# Scenarios

Airsoft games are limited only by the game organiser's imagination. They can range from live action role-play, weeklong continual games, science fiction games, fighting off zombie hordes, to bank robberies, historic re-enactments, full simulation of modern operations and everything in between. UK sites commonly play 40 minute games with a set objective to hold or retrieve and a start/respawn point for each team.

As it happens the UK has some of the highest standard of airsoft sites in the world – lucky you! Even in the US and Hong Kong, where they have very well founded airsoft communities, they consider British airsoft games to be some of the best. So when you turn up at a UK site you can never really know what the game organiser, and the enemy team, has in store for you!
